Finished 10th C.B.S.E Board with 85.5% in 2011 from
D.L.D.A.V. Model School, ND-Block, PitamPura, Delhi-88

INTERSHIPS

- NodeJS Developer at ServerGuy, working on an application for Sales Department which consist various server level information of several million domains using NodeJS, MongoDB and ReactJS.
- Backend Developer at WhiteSpace Studios, working as a PHP developer. Contributed in the product Book24 which is a web app to manage every aspect of a branch of a company, we used Phalcon PHP framework for this project. I have implemented payments of the add on products using stripe.
- Technical Intern at Bharti Airtel Ltd. under the tab of Data Analysis. Studied how to make Dashboards for the analysis of tickets and Macros to add dynamicity and interactivity, under supervision of Mr Aditya Anand.

PROJECTS

- A very simple clone of Omegle(omegle.com) made with NodeJS and Socket.io.
- A very modular structured NodeJS app boilerplate, built using NodeJS and MySQL.
- Developed a web app in PHP & JS, Techorenda. User can make a free account to start various courses and can view progress on basis of assignment completed. Frontend was done by two peers.
- Developed a web app in PHP: **Gym Locator**. App takes the current location of the user and shows gyms near that location, having other features also.
- Developed a web app in PHP: **Discussion Forum**. Where user can ask question and give answer with videos on topics related to technology and can also comment.

ACHIEVEMENTS

- Contributed as the Core Team Member to the official website for Techsurge & Mridang 2016, annual fest of MAIT, IPU.
- Worked as a coordinator in Entrepreneurship Development Cell in 1st year.
